PURPOSE OF THE BILL

The purpose of H.R. 1670, as ordered reported, is to amend the Sikes Act to improve the application of that Act to State-owned facilities used for the national defense.

BACKGROUND AND NEED FOR LEGISLATION

The Department of Defense (DOD) controls nearly 30 million acres of fish and wildlife habitat at approximately 400 military installations nationwide. These lands contain a wealth of plant and animal life, wetlands for migratory birds and nearly 300 federally listed threatened and endangered species. Prior to the Sikes Act Implementation Act of 1997, DOD was able to enter into voluntary “cooperative plans” with the Secretary of the Interior and the appropriate state fish and wildlife agency to carry out a program to plan, develop, maintain and coordinate fish and wildlife conservation efforts on military lands. These plans were neither uniform nor comprehensive in their requirements, and DOD was not required to implement them.

Under current law, DOD is required to complete a comprehensive Integrated Natural Resource Management Plan (INRMP) for each

of its installations. An INRMP is defined as: "An integrated plan based, to the maximum extent practicable, on ecosystem management that shows the interrelationships of individual components of natural resources management to mission requirements and other land use activities affecting an installation's natural resources." These plans should include the following components: fish and wildlife management and wildlife-oriented recreation; fish and wildlife habitat enhancement; wetland protection; establishment of specific management goals; public use of natural resources; enforcement of all natural resource laws; and how a "no net loss" of military lands would be ensured. The law allows for a public comment period for each INRMP, requires that each plan be completed within two years, stipulates that a sufficient number of professional trained natural resource management personnel be available to complete these plans and requires an annual report to Congress. These plans must be reviewed by installation commanders, the Service and the states regularly, but no less than every five years. The only exception involves those bases that do not have any significant fish, wildlife or natural resources. DOD believes that 380 military installations are required to complete an INRMP.

The fundamental goals of INRMPs are to assist installation commanders in their efforts to conserve and rehabilitate natural resources and to balance the use of its air, land and water resources for military training and testing with the need to conserve wildlife resources for future generations. They are a comprehensive approach to ecosystem management which, in a proactive way, protects endangered species and their habitats.

On November 24, 2003, the National Defense Authorization Act was signed into law and it modified a number of Sikes Act provisions. Among the changes was one to the Endangered Species Act which precluded the designation of critical habitat for listed species on DOD lands when those facilities had an approved INRMP. This was an important modification because thousands of acres of military lands were being designated as "critical habitat" and the net effect was that an increasing number of military training activities were being curtailed, eliminated or limited because of these restrictions.

The purpose of H.R. 1670 is to direct the Secretary of Defense to develop and implement an INRMP for 47 State-owned Army National Guard facilities in 30 states. This would affect some 510,546 acres. Under the terms of this language, DOD, in coordination with the Governor of each affected state and the Fish and Wildlife Service, would be responsible for completing an INRMP for each installation. While the vast majority of these state installations have implemented their own integrated plans, they have not been coordinating their efforts with the federal government. By coming under the jurisdiction of the Sikes Act, this should protect these state-owned installations from the loss of training lands due to critical habitat designations, it will establish a uniform standard for all Army facilities, and it will make these modifications without requiring any additional federal spending. Finally, the bill makes a number of technical changes to various provisions dealing with the conservation of wildlife species on military lands in an effort to conform this law with the many revisions that have occurred since this law was first enacted in 1960.

The text of this bill has been included in the National Defense Authorization Act for Fiscal Year 2012 (H.R. 1540).

COMMITTEE ACTION

H.R. 1670, the Sikes Act Amendments Act of 2011, was introduced on May 2, 2011, by Delegate Madeleine Bordallo (D-GU). The bill was referred primarily to the Committee on Natural Resources and additionally to the Committee on Armed Services. Within the Resources Committee, the bill was referred to the Subcommittee on Fisheries, Wildlife, Oceans, and Insular Affairs. The subcommittee held a hearing on the bill on May 12, 2011. On May 25, 2011, the Full Natural Resources Committee met to consider the bill. The Subcommittee on Fisheries, Wildlife, Oceans, and Insular Affairs was discharged by unanimous consent. A technical amendment offered by Delegate Bordallo was approved by unanimous consent. The bill was then favorably reported to the House of Representatives by unanimous consent.

COMMITTEE OVERSIGHT FINDINGS AND RECOMMENDATIONS

Regarding clause 2(b)(1) of rule X and clause 3(c)(1) of rule XIII of the Rules of the House of Representatives, the Committee on Natural Resources' oversight findings and recommendations are reflected in the body of this report.

COMPLIANCE WITH HOUSE RULE XIII

1. Cost of Legislation. Clause 3(d)(1) of rule XIII of the Rules of the House of Representatives requires an estimate and a comparison by the Committee of the costs which would be incurred in carrying out this bill. However, clause 3(d)(2)(B) of that rule provides that this requirement does not apply when the Committee has included in its report a timely submitted cost estimate of the bill prepared by the Director of the Congressional Budget Office under section 402 of the Congressional Budget Act of 1974. Under clause 3(c)(3) of rule XIII of the Rules of the House of Representatives and section 403 of the Congressional Budget Act of 1974, the Committee has received the following cost estimate for this bill from the Director of the Congressional Budget Office:

H.R. 1670—Sikes Act Amendments Act of 2011

H.R. 1670 would authorize the Department of Defense (DoD) to develop and implement integrated natural resources management plans (INRMPs) for state-owned National Guard installations. Such plans currently guide efforts to protect endangered species, manage forests and rangeland, control invasive species, operate recreational hunting and fishing programs, and direct other environmental management programs at federally owned facilities. The bill would permit federal appropriations to be used at state-owned sites, and also would allow National Guard installations to use those plans to protect endangered species, in lieu of having such sites designated as critical habitat by the U.S. Fish and Wildlife Service.

DoD spends almost \$200 million annually to develop and implement INRMPs for 29 million acres of federally owned or controlled land on military installations. Based on information from DoD, CBO estimates that an additional 450,000 acres of state-owned

land at National Guard bases would become eligible to receive funding for INRMPs under H.R. 1670. Based on the department's current spending for INRMPs for federal land, CBO estimates that developing and implementing those plans would increase spending by about \$9 million over the 2012–2016 period, assuming the availability of appropriated funds. Enacting the bill would not affect direct spending or revenues; therefore, pay-as-you-go procedures do not apply.

The estimated budgetary impact of H.R. 1670 is shown in the following table. The costs of this legislation fall within budget function 050 (national defense).

	By fiscal year, in millions of dollars—					
	2012	2013	2014	2015	2016	2012–2016
Estimated Authorization Level	2	2	2	2	2	10
Estimated Outlays	1	2	2	2	2	9

H.R. 1670 contains no intergovernmental or private-sector mandates as defined in the Unfunded Mandates Reform Act and would impose no costs on state, local, or tribal governments.

The CBO staff contact for this estimate is David Newman. The estimate was approved by Theresa Gullo, Deputy Assistant Director for Budget Analysis.

2. Section 308(a) of Congressional Budget Act. As required by clause 3(c)(2) of rule XIII of the Rules of the House of Representatives and section 308(a) of the Congressional Budget Act of 1974, this bill does not contain any new credit authority, or an increase or decrease in revenues or tax expenditures. CBO estimates that developing and implementing the bill would increase spending by about \$9 million over the 2012–2016 period, assuming the availability of appropriated funds. Enacting the bill would not affect direct spending or revenues; therefore, pay-as-you-go procedures do not apply.

3. General Performance Goals and Objectives. As required by clause 3(c)(4) of rule XIII, the general performance goal or objective of this bill, as ordered reported, is to amend the Sikes Act to improve the application of that Act to State-owned facilities used for the national defense.

EARMARK STATEMENT

This bill does not contain any Congressional earmarks, limited tax benefits, or limited tariff benefits as defined under clause 9(e), 9(f), and 9(g) of rule XXI of the Rules of the House of Representatives.

COMPLIANCE WITH PUBLIC LAW 104–4

This bill contains no unfunded mandates.

PREEMPTION OF STATE, LOCAL OR TRIBAL LAW

This bill is not intended to preempt any State, local or tribal law.

CHANGES IN EXISTING LAW MADE BY THE BILL, AS REPORTED

In compliance with clause 3(e) of rule XIII of the Rules of the House of Representatives, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic, existing law in which no change is proposed is shown in roman):
